U. S. HEADQUARTERS STAFF AND THE NAVY AVIATION CORPS IS REPORTED SAFE IN FRANCE

PARIS, June 8.—Pershing's task in France is described by Colonel Babey as most arduous. "It is not an expeditionary corps that will be sent from the United States, but a veritable army, which will be increasingly swelled by fresh contingents that is destined to occupy an ever increasing front."

An addition to the flotilla of American destroyers and patrol boats to co-operate with the French forces in the English channel and Atlantic, is expected shortly, according to Le Matin.

LACK OF CONFIDENCE IN ADMINISTRATION

Admiral Lacaze took occasion in the chamber to reply to certain criticisms of the navy and concerning the loss of various ships. Eighteen hundred voyages, he said, had been made by cruisers between Algeria and France, and only the Medjerda had been sunk. The commander of the vessel was responsible for having chosen his own route.

The great effort here now is to be friendly and sympathetic toward the provisional authorities at Petrograd rather than distrustful and intrusive. The government has adopted a firm policy of not allowing the slightest suspicion to arise that it is trying to interfere in the internal affairs of Russia, while at the same time standing ready and anxious to be of all aid possible whenever the hint is given.

The anti-annexation, anti-indemnity program of the council of workers and soldiers' delegates is not merely interpreted here as opposing territorial readjustments in the spirit of self government and national government which the Russians themselves proclaim they are fighting for. The first is thought only to forbid actual conquest and the second imposition of unitive indemnities such as Germany placed on France, when she extorted \$1,000,000,000 from her in 1870.

Consequently it is felt in official quarters here that while at first sight the Russian program appears to be in conflict with the readjustments desired by the allies, a detailed examination shows it not to be so in spite of the insidious workings of German propaganda to create a chasm.

In contrast to the allied war aims officials point out that recent announcements from Austria and Germany show that the central empires still desire actual conquest.
